Donna Jones	Jessica Grelle	Kathy Pieper	

Dr. Gaines spoke briefly about census numbers and the challenges it could place on facilities. The CAT may be asked to help determine solutions in the future.

Dr. Gaines spoke briefly about the upcoming town hall meetings. The next one is March 29 with the topic being finance. On April 18 the topic will be college readiness.

The group then moved to Room 54 of the middle school to review preliminary work on the accountability plan. Our overarching issue is alignment of curriculum, assessment, and instructional practices with rigor and support through professional development. Student achievement will obviously be the focus of the plan. We have two overall goals. The first is to meet all six MAP areas on the APR. The second is communicating the plan to staff and parents.

We then walked through what we were doing and preliminary ideas related to curriculum, assessment, and instructional strategies. A data institute planned for the summer was also discussed.

After questions and feedback the consensus was to continue to flesh out the framework presented.

CAT members then moved back to the library.

Dr. Gaines spoke briefly about MSIP 5 standards.

The next meeting is April 25.
